Context

MDPP services respond to high rates of type II diabetes among older Americans.

Problem

25% of Americans 65 years and older are living with type II diabetes, which negatively impacts health outcomes

Care for older Americans (65+ years) with diabetes costs Medicare **\$104 billion annually, and is growing**

MDPP Services

Health behavior change sessions furnished by coaches with the goal of **weight loss**

CDC-approved curriculum delivered in person to beneficiaries with an indication of prediabetes

Impact

Promotes healthier behaviors for eligible Medicare beneficiaries that could prevent or delay type II diabetes

Decreases healthcare costs associated with diabetes

Overview of MDPP Services

MDPP services are offered over a two year period and are intended to prevent the onset of type II diabetes.

- MDPP suppliers must offer a minimum of 6 monthly sessions during the second 6 months
