

Kentucky Telehealth Billing and Coding Workgroup

a KORH sponsored initiative

Healthcare providers have been using telehealth in Kentucky since 1994, but many are still unsure about how to properly bill and code for those services. The rules and regulations change frequently. We know that it is confusing because we get calls every week from providers who need help. At this year's Kentucky Telehealth Summit, we promised to start a billing/coding workgroup to provide a forum to share expertise and help you get the answers that you need.

This webinar will feature two national experts who will give you very practical information on filing claims with Medicare and others who will help you better understand the Medicaid and Commercial Health Plan rules. Currently, Kentucky Medicaid has an e-Reg in place and this will change in the near future. Bring questions and comments and if we can't answer, we will find the answers and reply later. We also want you to bring your expertise. We know that some of you have been successfully billing for telehealth services and we would like you to share that success.

January 14, 2020 3-4pm EST/2-3pm CST

Registration is required using the link below:

<https://tinyurl.com/kytelehealthbillingandcoding>

Webcast will be broadcast via Zoom and will have a limited number of connections. After you register, and before the date of the webinar, you will receive instructions to connect to the webinar. We will also record the session for those whose schedule does not permit them to participate. The deadline to register is January 8.
