

Cultivating more physician leaders

(RECRUITMENT AND RETENTION)

A Healthier Kentucky is a Better Kentucky – and It Starts with Physician-led, Team-based Care.

THE PROBLEM: **94%** of Kentucky counties are facing a primary care shortage.

THE SOLUTION: Invest in programs to recruit and retain more physicians, including graduate medical education funding and loan repayment programs, while continuing to reduce time-consuming administrative burdens that take physicians away from direct patient care.

This will ensure Kentuckians are getting the **right care at the right time.**

Studies show that physician-led care results in:

FEWER EMERGENCY ROOM VISITS

FEWER HOSPITAL ADMISSIONS AND READMISSIONS

SHORTER HOSPITAL STAYS

OVERALL LOWER HEALTH CARE COSTS

There's no substitute for physician-led, team-based care. It's what Kentuckians want and what leads to the best delivery of healthcare in communities across the commonwealth.
